

Design and Construction of Natural Living Playgrounds that nurture the child's soul

What is a Nature Playscape?

A **Nature PlayScape** embodies the qualities and essence of the natural world that we experience out in wild places. The ingredients, (the taonga /gifts of Nature) are selected or enhanced for their intrinsic feel to support the child's fundamental need to connect with the living world. A Nature Playscape is a living place, one that allows the child to play freely, to feel the earth beneath their feet and under their fingernails.

Design Services

In nature there are no straight lines so we reflect this in our methodology. Each design we create is a **unique** representation of the natural world. Our understanding in the development of the whole child and commitment to the children and the planet is woven into the design solutions in each Nature PlayScape.

A comprehensive design process ensures well considered ideas are possible, affordable, and able to be achieved within the scope of the project.

Our team brings lifetimes of experience to ensure your design is considered through many lenses. Our roles as educators, landscape designers, risk management advisors, builders, permaculture planners, parents and nature lovers assist us to work with you to achieve your vision.

Our designers provide creative **living** solutions to problematical places, and the ability to continuously come up with innovative concepts to present the child with nature's **beauty**.

Connecting the child's ♥ to the earth's ♥

Construction Services

We are creative craftsmen, gifted at working with natural materials to produce outstanding play spaces for the children. We **love** to build natural playgrounds.

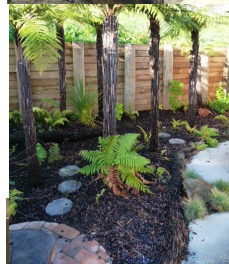

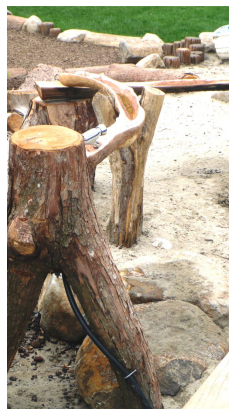

Our construction team is a collection of skilled tradesmen including qualified builders, landscapers and down to earth natural builders, each complementing one another. To bring your vision into reality we work as a co-operative team to meet the needs of the project.

The total wellbeing of the child is the foundation of Nature-Play NZ. We achieve this by creating **non-toxic** environments, using **natural materials** and accentuating the **living nature** (in particular edible, sensorial, native plantings)

The materials we choose to work with, wherever possible are sourced **locally**, in a **sustainable** and **respectful** manner.

Attention to **detail** and **quality** of finish are important to us, to ensure our playscapes are **safe** for the child. We recognize that windows of opportunity to construct are sometimes limited. Our project management skills work to minimize disruption to your routines and complete project with tight time frames.

Nature Playscapes work is for the children, the earth and the future so we consider this in all the decisions we make to bring your project to life.
